

CLAIMS

What is claimed is:

1. URL database software stored in machine readable format for use on an end-user computer, said URL database software comprising:
 - a database means for storing URL links in a database on the end-user computer,
 - 5 said database having records and each of said records having at least three fields relating to a single URL link which is stored in a first field,
 - a second field is used to store an editable URL title,
 - 10 a third field is used to store user entered notes, and
 - a URL navigation means for navigating the end-user computer to a URL site associated with a selected one of at least one of said first, second, and third fields of said records displayed by said URL navigation means.
 2. Software as claimed in Claim 1 further comprising:
 - an indexing graphical user interface including;
 - a means for entering said URL links in said 5 first fields,
 - a means for entering said URL titles in said second fields, and
 - a means for entering notes in said third fields.
 3. Software as claimed in Claim 2 wherein said means for entering said URL links in said first fields includes a Web browser on the end-user computer with a means to find and select a URL link 5 and a save means on said graphical user interface to enter a selected URL link in one of said first fields.

4. Software as claimed in Claim 1 further comprising a means for grouping said the URL links and associated records in selectable groups displayed on a screen displayed by said graphical user interface.

5 5. Software as claimed in Claim 4 wherein said graphical user interface further comprises;

a means for entering said URLs in said first fields of a categorized record in a selected group,

5 a means for entering said URL titles in said second fields of said categorized record, and

a means for entering notes in said third fields of said categorized record.

6. Software as claimed in Claim 5 wherein said means for entering said URLs in said first fields includes a Web browser on the end-user computer with a means to find and select a URL and a save means on 5 said graphical user interface to enter a selected URL in one of said first fields of said categorized record.

7. Software as claimed in Claim 4 further comprising a group hiding means for selecting one or more of said groups to be hidden from display on said screen displayed by said graphical user interface.

8. Software as claimed in Claim 7 further wherein said graphical user interface further comprises;

5 a means for entering said URLs in said first fields,

a means for entering said URL titles in said second fields, and

a means for entering notes in said third fields.

9. Software as claimed in Claim 8 wherein said means for entering said URLs in said first fields includes a Web browser on the end-user computer with a means to find and select a URL and a save means on 5 said graphical user interface to enter a selected URL in one of said first fields.

10. Software as claimed in Claim 1 further comprising a means for searching a displayed one of said fields.

11. Software as claimed in Claim 1 further comprising a search means for searching said records.

12. Software as claimed in Claim 11 wherein said means for entering said URL links in said first fields includes a Web browser on the end-user computer with a means to find and select a URL link 5 and a save means on said graphical user interface to enter a selected URL link in one of said first fields.

13. Software as claimed in Claim 10 further comprising a means for grouping said the URL links and associated records in selectable groups displayed on a screen displayed by said graphical user 5 interface.

14. Software as claimed in Claim 13 wherein said graphical user interface further comprises;
a means for entering said URLs in said first fields of a categorized record in a selected group,
5 a means for entering said URL titles in said second fields of said categorized record, and
a means for entering notes in said third fields of said categorized record.

15. Software as claimed in Claim 14 wherein
said means for entering said URLs in said first
fields includes a Web browser on the end-user
computer with a means to find and select a URL and
5 save means on said graphical user interface to enter
a selected URL in one of said first fields of said
categorized record.

16. Software as claimed in Claim 13 further
comprising a group hiding means for selecting one or
more of said groups to be hidden from display on said
screen displayed by said graphical user interface.

17. Software as claimed in Claim 16 further
wherein said graphical user interface further
comprises;

a means for entering said URLs in said first
5 fields,
a means for entering said URL titles in said
second fields, and
a means for entering notes in said third fields.

18. Software as claimed in Claim 17 wherein
said means for entering said URLs in said first
fields includes a Web browser on the end-user
computer with a means to find and select a URL and a
5 save means on said graphical user interface to enter
a selected URL in one of said first fields.

19. Software as claimed in Claim 1 further
comprising a record hiding means for selecting one or
more of said record to be hidden from display on said
screen displayed by said graphical user interface.

20. Software as claimed in Claim 19 wherein
said graphical user interface further comprises;

 a means for entering said URL links in said first fields,

 a means for entering said URL titles in said second fields, and

 a means for entering notes in said third fields.

21. Software as claimed in Claim 20 wherein said means for entering said URL links in said first fields includes a Web browser on the end-user computer with a means to find and select a URL link and a save means on said graphical user interface to enter a selected URL link in one of said first fields.

22. Software as claimed in Claim 19 further comprising a means for grouping said the URL links and associated records in selectable groups displayed on a screen displayed by said graphical user interface.

23. Software as claimed in Claim 22 wherein said graphical user interface further comprises;

 a means for entering said URLs in said first fields of a categorized record in a selected group,

 a means for entering said URL titles in said second fields of said categorized record, and

 a means for entering notes in said third fields of said categorized record.

24. Software as claimed in Claim 23 wherein said means for entering said URLs in said first fields includes a Web browser on the end-user computer with a means to find and select a URL and a save means on said graphical user interface to enter a selected URL in one of said first fields of said categorized record.

25. Software as claimed in Claim 19 further comprising a password means for storing log-in information which allows storage of a script of a sequence of keystrokes performed to log-in to a
5 password secured URL, to save script to a password field in said database, generate a log-in script which a browser will run whenever it detects the end-user navigating to the password secured URL with the defined script, and automatically log-in to said
10 password secured URL.
